

THE LEARNMORE™ APP

Using augmented reality each of our interactive posters produced for the LearnMore™ App features a scientific topic, relates it to an invention and inventor, then provides the learner with an unforgettable, historical and scientific interactive experience right there on any mobile device.

SCIENCE

Interact with engaging scientific topics through 3D animations and detailed explanations and demonstrations.

HISTORY

Drop into history through immersive historical content and videos that allow you connect with a time and place.

ADVENTURE

Explore each interactive poster to discover and experience important science topics and their place in history!

Immersive Learning Adventures

EDISON'S LIGHTBULB

With the power of the LearnMore™ App, Thomas Edison and this historical moment in time come to life on your cell phone or tablet.

FATHER'S OF INVENTION

Discover the inventions of the founding fathers of our country with Ben Franklin, George Washington and Thomas Jefferson.

WRIGHT FLIGHT SCHOOL

Take to the sky with this educational adventure as you discover the history and science of the Wright Brother's airplane.

HISTORY IN MOTION

In this interactive poster, you select and learn about different systems and components that make up the Ford Model T.

SPACE JOURNEY

Explore the space from an amazing first person view and learn about orbits, the sun, distances, gravity and the solar system.

HUMAN ANATOMY

Peel away layers of the human body from the top layers of your skin through your organs and all the way down to your bones.
